OBJECTIVE

Full-stack developer skilled in MERN stack, backend systems, and real-time applications, seeking software engineering opportunities to build impactful products.

EDUCATION

B.Tech in Computer Science

2023 – 2027

IITM College of Engineering

Affiliated to Maharishi Dayanand University

SKILLS

Languages JavaScript, Java, Python, SQL

Frontend HTML5, CSS3, React.js, Bootstrap, Tailwind CSS

Backend Node.js, Express.js, REST APIs, JWT Authentication

Database MongoDB, MySQL

AI/APIs Gemini API, Generative AI Integration

Tools Git, GitHub, Postman, VS Code, Render, Vercel, Puppeteer

Concepts DSA, DBMS, OOPs, Operating Systems, MVC Architecture

EXPERIENCE

Talking Crooks IT Pvt. Ltd.

May 2026 – August 2026

Technical Intern

Virtual

- Conducted market research and built a lead database of 175+ businesses, identifying digital service gaps (website, GMB, social media) to support the sales pipeline.
- Identified a real manual process gap in an underserved industry and designed a wireframe/prototype proposing a digital solution.
- Collaborated with Sales & Marketing teams, delivering structured, accurate research to support business outreach and lead generation.

PROJECTS

• Wanderlust – Travel Listing Web Application

[\[Preview\]](#)

Tech Stack: Node.js, Express.js, MongoDB, EJS, JavaScript, Bootstrap, Passport.js

Implemented secure user authentication and session management using Passport.js. Built complete CRUD functionality for travel listings with efficient MongoDB database handling and responsive UI design.

• Resume Genie – AI-Powered Resume Interview Prep

[\[Preview\]](#)

Tech Stack: React.js, Node.js, Express.js, JWT, Gemini API, Puppeteer

Built a full-stack Gen AI job-preparation platform with secure JWT-based authentication and token blacklisting. Integrated Gemini AI for resume parsing, skill-gap detection, and AI-generated interview questions, along with dynamic ATS-optimized resume/PDF generation using Puppeteer.

• Smart Road Monitoring & Pothole Detection System

[\[Preview\]](#)

Tech Stack: MERN Stack, ESP32, MPU6050 Sensor, GPS Module

Developing an IoT-enabled road monitoring system using ESP32 sensors and a MERN dashboard to detect potholes and visualize real-time road condition data for maintenance planning.

CERTIFICATIONS

- Introduction to Machine Learning - IIT KGP (NPTEL) [\[Certificate\]](#)
- Oracle Cloud Infrastructure Generative AI Professional (1Z0-1126-1) [\[Certificate\]](#)
